

GOING GREEN AT ANASTASI & ASSOCIATES, P.A.

The average American attorney uses one ton of paper every year.¹

The United States used 8 million tons of office paper in 2004, which is the equivalent of 178 million trees.²

Enough office paper is used each year in the United States to build a 10-foot-high wall that's 6,815 miles long. That's more than the distance from New York to Tokyo.³

We at Anastasi & Associates are doing our part to go green by sending more communications and documents electronically. If you have a preferred method for receiving office communications, just contact one of our attorneys and we'll be happy to accommodate your request.
